PRODUCTIVITY

1. Minimize Downtime
- Blast when you need to, don't wait for the weather.
- Contains media for easier clean-up when you need it.
- Keeps blast process in one area so you're ready to blast at the push of a button.

2. See the Result
- **LED lights** for high visibility to ensure consistent blasting and full coverage.
- Designed for optimal cross flow ventilation for maximum visibility while blasting.
SAFETY

3. Meet Safety Standards
- Door Interlocks standard on all man doors and work doors to enable OSHA compliance.
- Room is designed for airflow to comply with ANSI Z9.4 Ventilation Rates.

4. Keep Employees Safe
- Dedicated blast space so other employees are not exposed to stray blast, ricochet, or other hazards.
- Keeps dust in the blast room and out of the rest of production, particularly important when removing hazardous materials or coatings from workpieces.

Clemco Industries Corp
PERFORMANCE

5. Built To Last

- Galvanized steel wall panels for long lasting performance, available in 10ga or 16 ga to fit any applications needs.
- Easily **replaceable rubber curtains** to protect side walls from overspray and ricochet.

6. Easy to install & Use

- No welding required for install – Quickly bolt pieces together.
- Also available with **VHB tape** on select applications for a quicker install with reduced bolt assembly and reduced seam caulking.
- Dedicated hose pass-throughs and **equipment hooks** for efficient operations.
- Heavy duty, swing out work doors for easy work piece entry and a quality seal.

SPECIFICATIONS

- 10ga rooms any size.
- 16ga rooms up to 24'Wx24'H, any length.
- *Optional:* Rubber curtains, but recommended especially in aggressive media applications.
- *Optional:* Bi-fold doors, **rubber roll-up doors (7)**.
- *Optional:* Monorails, **man-lifts (8)** and other part handling solutions.
