- Screen Basket (New Style)
- Ring with three pins
- Band Clamp
- Easy to install (instructions below)
- Replaces old style basket

Debris Screen Conversion Kit

ZERO Products now offers a low-cost way to upgrade your reclaimer to use the new, larger debris screen found on new ZERO reclaimers.

The larger basket does not interfere with the cyclonic process, so media separation is actually improved. The basket holds more debris and can be removed, emptied, and replaced in seconds —without tools.

Converting your old ZERO reclaimer to accept the new screen basket takes just a few

minutes. The simple retrofit kit includes a ring and band clamp that fits any ZERO reclaimer with a vertical flange.

21280 Retrofit Kit
(fits ZERO 300/600/900 cfm reclaimers with vertical flange). Includes Ring, Band Clamp, and one Screen Basket.

21265 Screen Basket
Replaces original stock no. 13131

INSTALLATION INSTRUCTIONS

1. Use a pliers to fold up the old retaining clips, (or grind them off).
2. Place the band clamp and basket ring over the vertical flange, then tighten the band clamp.
3. Hang the new screen basket from the three pins.
4. Check the basket twice each day and empty as needed.
